

Space for business growth.

Industrial and warehouse spaces in Georgia

GV Capital | Company and Projects · 2026

Lilo · Phonichala · Teleti

INDUSTRIAL & LOGISTICS

An investment and development holding company.

GV Capital brings together investment and development activities. The company's initial focus is industrial and logistics properties in Georgia.

Space for businesses seeking their own production or warehouse infrastructure. Acquisition of the full complex or individual units is considered according to operational needs.

Trust · Partnership · Long-term vision

Advantages

More opportunities for your business.

01 **Strategic locations**
Fast access to major highways, markets and distribution networks.

02 **Flexible spaces**
Modular production and warehouse spaces adapted to business needs.

03 **Integrated management**
A consistent management model across design, construction and future operations.

04 **Efficient infrastructure**
Energy-efficient solutions, reliable technical systems and a safe working environment.

05 **Growth potential**
A shared business environment for production, logistics and distribution, with room to scale.

Phonichala

Tbilisi, Krtsanisi District
39 Marneuli Street

Total gross building area

31 406 m²

Total land plot area

55 992 m²

Three buildings. One integrated complex.

Proximity to the capital and access to major highways support fast delivery across Tbilisi and the regions, while helping optimise distribution costs.

The complex comprises two industrial and warehouse buildings and one administrative building, together with loading areas, cargo mezzanines and supporting infrastructure.

Project 03 / Development concept

Teleti

Industrial park

A multifunctional business environment for production, logistics and distribution. Flexible spaces and shared infrastructure create opportunities for long-term growth.

50 ha	300 000 m²	150 million USD
Planned site area	Planned gross building area	Planned investment

Flexibility

Adaptable spaces
Blocks up to 500 m²

The concept provides spaces adapted to the scale of each business, energy-efficient buildings and a safe operating environment.

The figures reflect the design concept presented in the new annex and require confirmation in the final technical documentation.

Partnership / Next step

Let us discuss your space.

Let us discuss your operational needs, the appropriate project and the preferred acquisition format.

01

Needs assessment

Area, intended use and the technical requirements of your operations.

02

Documentation review

Project plan, space allocation and key specifications.

03

Terms discussion

Selected space, acquisition format and individual terms.

Space selection criteria

Use	Production, storage or a combination of functions.
Area	Main work zone, administrative space and auxiliary areas.
Technical requirements	Clear working height, floor load, power supply and type of freight vehicle.

Contact GV Capital

Lilo · Phonichala · Teleti

Discuss detailed plans and individual terms for the selected project with a company representative.

Future operations

Centralised technical management, security, monitoring and administrative support for tenant companies.

Plans shown in this brochure are for information only and must not be used for measurement. Detailed review requires the complete project technical documentation.
